

Proceedings of
Second Nordic
Minisymposium on
Carbon Dioxide
Capture and Storage
October 26, Gothenburg 2001

Nordisk energiforskning

CHALMERS | GÖTEBORGS UNIVERSITET

Centre for Environment and Sustainability

Editors:

Anders Lyngfelt

Filip Johnsson

Christian Azar

available on <http://www.entek.chalmers.se/~anly/symp/symp2001.html>

Contents

Contents, Acknowledgement	ii
Programme	iii
Speakers	iv
Anders Lyngfelt: An Introduction to CO ₂ Capture and Storage	iv
Erik Lindeberg: Experiences from storing four million ton carbon dioxide in the North Sea - Simulation of CO ₂ distribution pattern in an underground CO ₂ injection projected calibrated by 3d seismics	1
Niels Peter Christensen: Assessing European Potential for Geological Storage of CO ₂	7
Ron Zevenhoven: CO ₂ Sequestration by Magnesium Silicate Mineral Carbonation in Finland	13
Olav Kaarstad: Hvordan et oljeselskap ser på CO ₂ -fjerning og -lagring	19
Hallvard Svendsen: Absorpsjon innen CO ₂ -fjerning	24
Olav Bolland: Combined Cycle with CO ₂ Capture Based on the Pre-Combustion Method	30
Tord Ursin and Per Tore Halvorsen: HiOx - Emission Free Gas Power	36
Asle Lygre: Solid Oxide Fuel Cell Power Plants with Integrated CO ₂ Capture	41
Tobias Mattisson: Applications of chemical- -looping combustion with capture of CO ₂	46
Sven-Gunnar Sundkvist: AZEP - Development of an Integrated Air Separation Membrane - Gas Turbine	52
Lars Strömberg: CO ₂ -free power production in Europe. Technology and costs	58
Christian Azar: Carbon sequestration from fossil fuels and biomass - long-term potentials	64

Acknowledgement

This minisymposium has received financial support from the Nordic Energy Research Program (NEFP) and from the Centre for Environment and Sustainability at Chalmers / Göteborg University.

Programme (in Nordic):

Inledning: Anders Lyngfelt/Filip Johnsson
Erik Lindeberg: Erfarenheter från lagring av fyra miljoner ton koldioxid i Nordsjön
Niels Peter Christensen: Geologisk lagring av CO₂ i Europa
Ron Zevenhoven: CO₂-lagring i Finland genom mineralkarbonering
Olav Kaarstad: Hvordan et oljeselskap ser på CO₂-fjerning og -lagring
Hallvard Svendsen: Absorpsjon innen CO₂-fjerning
Olav Bolland: Kombinert gass- og damp turbinprosess med CO₂-innfangning basert på metode med avkarbonisering av naturgass
Per Tore Halvorsen og Tord Ursin: HiOx - utslippsfri gasskraft
Asle Lygre: Brenselcellekraftverk med integrert CO₂-fangning
Tobias Mattisson: Tvåstegsförbränning (chemical-looping combustion)
Lars Strömberg: CO₂-fri kraftproduktion i Europa. Teknik och kostnader.
Christian Azar: Koldioxidavskiljning och kyotoprotokollet
Sven-Gunnar Sundkvist: AZEP - Development of an Integrated Air Separation Membran - Gas Turbine
Diskussion

Speakers:

Christian Azar, Chalmers University of Technology, Gothenburg

Olav Bolland, Norwegian University of Science and Technology, Trondheim

Niels Peter Christensen, the Geological Survey of Denmark and Greenland - GEUS, Copenhagen

Per Tore Halvorsen, Aker Maritime, Oslo

Filip Johnsson, Chalmers University of Technology, Gothenburg

Olav Kaarstad, Statoil, Trondheim

Erik Lindeberg, SINTEF/NTNU, Trondheim

Anders Lyngfelt, Chalmers University of Technology, Gothenburg

Tobias Mattisson, Chalmers University of Technology, Gothenburg

Lars Strömberg, Vattenfall AB, Stockholm.

Sven-Gunnar Sundkvist, Alstom Power Sweden AB, Finspång

Hallvard Svendsen, Norwegian University of Science and Technology, Trondheim

Tord Ursin, Aker Maritime, Oslo

Ron Zevenhoven, Helsinki University of Technology, Espoo
